Australia's Goth Rockers Temujin

by **Scott** on June 23rd, 2008

The **Goth rock** scene in the United States went underground just as quickly as it came. Bands like **Lacuna Coil** and **Evanescence** (If you want to call them goth) popped onto the scene, but the genre went back underground (in the U.S. anyway) without giving many other bands a chance to emerge. Many bands broke from the scene in order to stay on the mainstream and break from the “Trend”, while others stuck to their roots and soldiered on. One of those bands is indie label, **Renaissance Records** recording artist **Temujin**. With their latest release 1000 Tears. 1000 Tears brings soothing vocals from singer Kelly and all the rest from Karl who takes on the roles of guitars, drums and bass with additional musicians filling in the gaps for recording. The self produced debut album keeps the goth genre relevant and alive in an age where there is so much music to be had and not enough ears to partake.

You can visit their [myspace](#) to learn more about **Temujin** and follow links to download songs from **1000 tears**.
