1000 Tears

---

Temujin hail from Melbourne, Australia where they have managed to write, record, and now release a stunning debut album "1000 Tears". The record is filled with highly melodic and enchanting Gothic influenced Metal that demands your attention. More interesting is the fact that Temujin are made up of only two permanent members, Karl who covers Guitars, Bass, and Drums, and Kelly doing her part on the beautiful vocal portions.

One thing that stands out in particular is the albums way of capturing you and truly making you feel the power of the writing. Kelly and Karl have put a great deal of heart and soul into this album and it really does show through in the passion of the creation. I think this is a great start to what hopefully is a ongoing musical journey.
